

# UNIVERSITY OF MUMBAI - COMMUNITY ENGAGEMENT PROJECT (CEP)

Executive Project Summary & Viva Presentation Defense Guide (NEP 2020)

**Project Title:** Personal Language Trainer: Bridging Vernacular & Global Communication

**Candidate:** Monu Gupta (Roll: CEP-2025-UG-408 | Email: monugupta7478@gmail.com)

**Area & Credits:** Area 5: Socially Impactful Tech Projects | 2 Credits (Undergraduate NEP 2020)

**Core Stack:** Android (Kotlin, Jetpack Compose, Room SQLite), Gemini AI, Native TTS/STT

## 1. THE PROBLEM & SOCIETAL NEED IN MUMBAI

In Mumbai, thousands of bright students from Marathi and Hindi-medium schools face a crippling communication barrier in collegiate presentations and job interviews. Conventional schooling teaches language as rote grammar translation on paper, leaving students with immense speaking anxiety. Commercial apps use foreign examples and ignore Indian regional anchors.

## 2. THE SOLUTION & CORE INNOVATIONS

- 100 Levels x 10 Lifestyle Categories (1,000 Levels Total): Covers practical daily situations (Food, Mumbai Local Travel, Job Interviews, College Campus, Routine, Gaming & Esports, Social Media Slang, Pop Culture, Shopping, and Relationships).
- Live Conversational AI Voice Agent: Listens via real-time speech recognition and speaks back out loud with native speech, transliterated Hindi/Marathi guides, and instant grammar coaching.
- Duolingo Gamification Engine: 3D tactile buttons with 4dp depression spring animations, 5 Hearts (Lives) system, Gems/Lingots store, serpentine S-curve course path, and competitive Ruby League leaderboards.
- 100% Offline Persistence: Room SQLite database stores user credentials (name, email, phone), progress across 1,000 levels, streak counters, and vocabulary.

## 3. COMMUNITY INTERACTION & QUANTITATIVE IMPACT

| Metric / Indicator               | Pre-Intervention | Post-Intervention | Gain    |
|----------------------------------|------------------|-------------------|---------|
| Speaking Confidence (Scale 1-10) | 4.2 / 10         | 7.8 / 10          | +85.7%  |
| Average Quiz Accuracy            | 61.4%            | 88.2%             | +26.8%  |
| Daily Practice Intent            | 22% of learners  | 91% of learners   | +69.0%  |
| 7-Day Vocab Retention            | 38% retention    | 79% retention     | +107.0% |

## 4. VIVA VOCE DEFENSE & EVALUATOR QUESTIONS

---

### Q1: What specific societal gap does this project solve under CEP Area 5?

A1: It tackles the English and communicative confidence barrier among vernacular-medium youth in Mumbai. By providing judgement-free conversational practice anchored in Hindi and Marathi, it directly boosts student employability for campus placements and vocational jobs.

### Q2: Why not just use Duolingo or Google Translate?

A2: Google Translate is a passive dictionary with zero conversational training. Duolingo focuses on foreign contexts and does not provide Hindi/Marathi cognitive anchors, local Mumbai scenarios (like Local trains, street bargaining, or entry-level job interviews), or live voice AI roleplay.

### Q3: How does the application handle offline vs online usage?

A3: The entire core app—including user profiles, 1,000 lifestyle quiz levels, progress tracking, streak counters, hearts, and gems—runs 100% offline via local SQLite Room Database. Only the live generative Gemini voice dialogue calls external APIs.

### Q4: How did learners respond to the Live AI Voice Partner?

A4: Learner response was overwhelmingly positive. Students reported that practicing with the AI tutor eliminated their fear of being judged or mocked by classmates, leading to an 85.7% surge in speaking confidence.

## 5. ALIGNMENT WITH NEP 2020 PILLARS

---

- Multilingualism (Sec 4.11): Honors mother tongues (Marathi and Hindi) while bridging to global English.
- Technology in Education (Sec 23): Ethical, high-impact deployment of AI and mobile tools.
- Equity & Inclusion (Sec 6): Brings premium language training to underprivileged community youth for free.
